Industries

Customers are increasingly demanding a proactive all-round customer experience and quality of service. With the right partner and right tools, you can tackle challenges efficiently and effectively, and truly master the new markets in digital era. We have already and continue to partnership in almost every possible industry sector:

- ❑ IT & ITES
- ❑ Media & Entertainment
- ❑ Retail
- ❑ E-Commerce
- ❑ Pharma & Healthcare
- ❑ FMCG
- ❑ Hospitality

Developers & Add-ons

We understand and thrive on technology. All of our software application are built to ensure any developer who want to interface an application with our infrastructure can do so reliably and easily. Our APIs are fast simple and reliable and built in such a way that it is easy to manipulated to suit any system or platform.

HTTP API

HTTP Rest API is ideal for web based services, providing straightforward integration with all the popular programming languages. API support HTTP Get and Post methods.

SMPP API

With high throughput, SMPP API provide carrier-grade access to messaging gateway for sms MO and sms MT services.

SOAP API

Simple Object Access Protocol relies heavily on XML, and together with schemas, defines a very strongly typed messaging framework. Use SOAP API in any language that supports Web services.

Add-ons & Integration

We have developed built in plugins and messaging addons, seeks to ease messaging integration pain points.
